## THE 'SYSTEM WAR' HEATS UP!

If you were one of the unfortunate group of players who bought either the Genesis or Super Nintendo game systems last year you probably are not going to be too glad to hear that your \$160 to \$200 investment in a system has just been cut in half. Yes, the 'system war' is going great guns and neither Sega nor Nintendo will give the other company any chance to get a sales edge. Over the past 6 months the system prices have changed so often that retailers no longer have any idea as to what price to put on their inventory. As soon as the prices are changed, they have to be changed again, and always downward. However, it now looks like the prices have gone about as low as they can, as this last price cut necessitated major changes in the system configuration. Now, with only one controller and no pack-in cart the systems have apparently reached rock bottom.

While not great for the stores, the players who sat on the fence thinking about upgrading are enjoying every minute of the war. This Christmas shopping season (when about 60% of the toys are sold) should prove to be one of the best ever for the retailers. They will sell a lot of systems, but not make a lot of money. Still, don't feel too sad for the poor store owners as everything they will lose on the sale of the system, they will make up (and then some) on the sales of the games. There are not too many people who believe that a cartridge is really worth from \$60 to \$80. America, for one, has proven with their Aladdin project that good games (albeit 8 bit carts) can be sold for less than \$20.

Unfortunately, there are losers to this new 16 bit war. With the Super Nintendo at \$99, how many older 8 bit NES' will Nintendo sell at \$79? The handwriting was on the wall about the eventual demise of the NES though, as most of the licensees have already switched over their R & D efforts to S-NES game production.

Sega has to be smiling though. They have lowered their prices to the point where the NES users now can inexpensively upgrade to another system. Many of those will switch from Nintendo to Sega.

Another nice point is that the price war is spreading over into the portable area. This time it is Sega vs. Atari. Sega's Game Gear is coming down to \$99 and Atari is rumored to be bringing the Lynx down around the \$80 price point.

Who is going to win this latest war? It is quite possible that nobody will really ever know. Sales figures are provided by the companies and aren't audited. Nintendo claimed to have sold over two million systems in three months last year. Few analysts believe that number and place the actual amount as about half that amount. Now they are saying they will sell six million more Super Nintendo systems this year. Sega is stating that they will double their user base. Who is right? We'll have to wait until after Christmas to see. Until then, the one thing that we can count on is that the real winner will be the game players, as for the first time in gaming history, the new systems are actually priced at a point where almost everybody can afford to upgrade.

## STREET FIGHTER 2 UPDATE...

My favorite game in the arcades is Street Fighter 2. Once I heard that it would be coming out for the Super NES I decided then and there that I had to have it even though I am a devoted Genesis user. I am prepared to go out and buy a new Super NES just for the cartridge. What I need to know from you, the Street Fighter 2 authorities, is if what Quatermann said back in May will happen soon. I would believe that I could get a better deal if I wait until the new S-NES system with Street Fighter 2 as the included cart comes out. When will that happen?

Gary Tobin  
Clinton, OK

I think it is grossly unfair that Capcom will not be making a Street Fighter 2 for the Genesis. Clearly the Genesis is far superior to the Super NES and I would bet that Capcom could make a killer version of the game for us 2 million Genesis owners. Have you heard any new information as to whether this will ever come about? If not the Genesis, how about a Sega CD version of the Champion Edition?

Zeke Hughes  
Lower Lake, CA

I have heard several rumors that perhaps you can confirm or deny. The first is that Capcom of Japan is working on a new 32 bit Street Fighter 3 game. Is this the same Street Fighter 3 arcade that Quatermann talked about in July? Did you get a sneak peek of the game in

development on one of your many trips to Japan? Or is it already out on test in another country? Some friends have told me that they have already played Street Fighter 3. Could this be true?

Adam Hollands  
Norcross, GA

Some of my friends have already purchased the Japanese Super Famicom version of Street Fighter 2. They are telling me there is a trick in the game where you can play character vs. character (not the bosses though) as in the Champion Edition. Is this really possible? Will it be in the U.S. version of the game. I called the Street Fighter 2 Hotline and they say that character vs. character isn't possible. Who is right?

Mark Hurst  
Los Angeles, CA

**Play character vs. character with this secret trick hidden in the domestic version of Street Fighter 2! See page 54!!**

(Ed. Rumors, rumors, rumors! Many times it is very hard to tell what is a really hot news item and what is just heresay. With the popularity of this super hot game there certainly has been no shortage of rumors, but even master journalists like Quatermann can occasionally make mistakes. To get the straight scoop we went right to Capcom's public relations manager, Laurie Thornton, for the real answers to make this editorial retraction.

1) There will not be a repackaging of the Super NES with Street Fighter 2 as the new pack-in cartridge. Discussions between Capcom and Nintendo regarding this subject have never taken place.

2) Capcom U.S.A. currently has no plans to license Street Fighter 2 for the Sega Genesis or Atari Lynx.

3) Capcom states that the Street Fighter 3 game mentioned in Quatermann's July column was actually a Street Fighter 2 Championship Edition erroneously named by the arcade owners.

4) As to the character vs. character trick in Street Fighter 2, Laurie has confirmed that the character vs. character trick (see page 54 in this issue) that works in the Japanese Super Famicom version of Street Fighter 2 will be retained in the U.S. version of Street Fighter 2.

One final point, as you know by now, the Sheng Long trick published in our April issue was our April Fool's joke. Sheng Long doesn't actually exist.)

## KUDOS FROM OVERSEAS...

Tell your readers to stop moaning. You don't know how lucky you are in America. Most of the carts come out months before they do here in England. And when we do get them, they cost twice the price you pay for them. It is just not fair. It is even worse in the rest of Europe - especially Austria!

You write a great magazine and even though it is very hard to find over here, and it is usually at least a month old, we still find it is easily worth the search! Keep up the good work!

Philip Corbett  
Kenilworth, England

(Ed. Thanks for the compliment Philip. Have you considered getting a subscription? We send all of our overseas subs out airmail and you would then get the hottest gaming info even faster!)

# ARCANA

The future of the kingdom  
is in the cards . . . and in your hands . . .

Somewhere in the temple of Balmia a passageway to the other side has been opened. Vile creatures of all kinds have been recruited by the corrupt magician Galneon to help him reincarnate the wicked Queen Rimsala. The Region of Evil seems assured. Only one brave warrior stands in his way. Last of the mystical Cardmaster sect, the untrained Rooks must use what little he knows of the ancient art to thwart the conspiracy and restore his tiny kingdom of Elemen to its previous glory. Only Rooks holds the key that will unravel Galneon's plan.

## EGM AND SEGA RULE AT CES!

I had the great privilege to attend the Summer CES and it was incredible! I was expecting a great show, but what I saw blew me away! The largest crowd was around the Sega booth and more specifically the Sega CD. The area that Nintendo set aside for the public was large, but uneventful. They had their old games out and what was new was not spectacular. However, after checking out the game companies, I wanted to see what the magazines were doing. One wasn't even there, the second was dead with only sales people drinking coffee, the third was O.K. but yours was a trip! It took me 10 minutes just to get to the counter for your free magazines! And, the line to play your two Street Fighter 2 Champion arcade games was at least 50 feet long! Thanks, guys, for going all out for us consumers!

John Carlton  
Iowa City, IA

### Could this be the super-secretive Sushi-X??

The CES was awesome! I just got home and it was beyond my greatest expectations! Your booth was great, too!

One last thing. I brought along a camera hoping to get a snapshot of Sushi-X so I could finally unveil the true identity of this guy. However, he is as quick and elusive as he is cooked out to be! First of all, I asked the lady at your booth where he was. All she said is that he could be anywhere at the show! So, I went to the most likely place, the SF2 game station! There I saw a Japanese guy kick'n butt on SF2. C'mon, who else could it have been!? By the time I got close enough to take a picture, he had disappeared! He must have seen me coming or something. Very sneaky Sushi-X, but I have to warn you, I haven't given up yet!

Scott Fox  
Minooka, IL

First of all, I'd like to shake the person's hand who decided to have this year's CES open to the public! I was there first-hand, and let me tell you it was the most outrageous gaming experience of my life. The Sega booth was the best around, especially getting to see Batman for the Sega CD! Sonic 2 was awesome! Nintendo was O.K., but I didn't like the idea of not being able to go to all of their booths. Why did they have them roped off?

Hey, where were the magazines? I found yours just by following the SF2 lines. Thanks for the free mags! I really appreciate getting your July issue weeks before it hits the newsstands. What I really liked was the fact that all of your editors were there to talk to us. It looked like you really went all-out to be there for the consumers! Thanks again!

Paul Radenson  
Madison, WI

### Hundreds of players waited patiently to get a chance to take on the EGM editors (Ken Williams pictured) at SF2 Champion Edition!

(Ed. We were very pleased to meet all of the great players that came to the CES. We had tons of magazines, T-Shirts, S-NES SF2 cartridges and posters and lots of other goodies to give away! However, what is a booth without a game to play? Thanks to the kind people at Capcom (who loaned us two SF2 Champion Edition arcade machines and donated the carts and posters!) we were able to really go all-out for the consumers at CES, and, judging by all of the positive responses from everybody who wrote, faxed and called in to tell us about their experiences, we are very pleased to hear that you also had a good time. After all, it is the consumers who buy the games and magazines, and we couldn't pass up a great opportunity to say thanks for your support! If you thought this was a big event, wait until you see what we will do next year!)

## SHENG LONG HITS HONG KONG!

Your April Fool's trick (the Sheng Long one) is so incredible that it is now over-seas! One of your readers from Texas thought this trick was for real and he sent it to a comic book called Street Fighter (where all of the main characters are from Street Fighter 2) in Hong Kong.

Now, everybody (including the editors of the comic book) thinks that there really is a Sheng Long character in the arcade game! The editors said in their article that they are going to go in and read the program code in the arcade game in order to be able to see the character themselves! Good job EGM. You now have created an international monster!

## GAME OF THE MONTH

### AXELAY

Konami's Axelay gets the nod as the best game this month. Their programming wizards have been able to overcome the slowdown problem that still plagues many Super NES games, and also, by building in new and revolutionary 3-D effects, the game comes off as a solid winner in the graphics, sound and game play category.

One spacecraft remains after a vicious assault by an alien task force. That ship is Axelay. You have been selected as a top ace, capable of flying the ship deep into enemy territory! However, you will not be alone because you will have a pilot's best friends (missiles and guns) to help you! Blast through six exhausting levels of hyper-intensive play with various weapon choices appearing at the start of each level!

Axelay takes shooters to all new heights with play mechanics and spectacular graphics melded into a single interstellar blast-a-thon! The game utilizes a wide variety of Super NES special features and provides a wild array of weaponry in both the pseudo-first-person and side-scrolling perspectives. Absolutely incredible!

Wow! This is the game that all shooter fans will want to have. Spectacular, and I mean SPECTACULAR! Mode 7 effects, along with HUGE, intimidating bosses. The graphics are about the best the Super NES can do and there is no trace of slowdown. It's a tough game on its hardest difficulty level.

Axelay is everything that I expected it to be, minus a few minor details. The graphics are mind-blowing and the 3-D effects are among the best I've seen on the SNES. The music is cool and sounds great in stereo. Each level is intense and the gameplay is almost perfect. With only six levels though, it's over too soon.

Axelay is the most innovative shooter I've seen since Gaiard. Its unique three-dimensional scrolling is incredible! Without a doubt, the mode 7 effects are going places in the future. The scaling is a little choppy, but who cares? You like shooters, then Axelay is a must. Besides the phenomenal graphics, the music jams.

Timmy and Jamie are two sweet little kids that are in a heap of trouble! They wandered into their father's lab and accidentally triggered a time machine that warped them into an unreal world! Timmy and Jamie have found some dinos that have agreed to help them. Six levels of prehistoric fun with cartoon graphics and kooky sounds highlight Dinosaurs. You can also jump off the dinosaurs to fly by yourself!

Although this game enjoys some of the nicest Super NES graphics yet, the theme is less than exhilarating while the pace remains stuck in the classes. It does possess many of the proven play concepts that have established Mario to the moon, but the overall execution of this title was cooler than it should be.

What the Super NES needs is more fun games like this one. Sure, though it looks cute, and it will certainly appeal to the younger player, it's a game the parents can sit down with their children and have fun with. It's not certainly difficult but it does play well and has a difficulty curve that won't frustrate the younger crowd.

This game reminds me of Blaster Master with cute dinosaur graphics. The theme of the game is geared to the younger audience, but the game play speaks for itself. Plenty of techniques and great control are complemented by colorful graphics and cute animation. The music is good and the originality is a plus.

Dino City is another excellent title that seems geared for the young adults can play too. I loved the animations and flip-pant music throughout each adorable level! It may not be a mind-breaking or a blockbuster hit in the video game scene, but Dino City can more than hold its own in the flooded marketplace.

Prepare for a new type of adventure! Lester Knight Chaykin decides to return to his office to catch up on some work. He engages in an experiment that goes horribly wrong! Lester Chaykin has been zapped Out of this World! OOTW features graphics presented in a cinematic style and a series of traps, pitfalls and enemies that will blow you away! This is not your average game, this is Out of This World!

Like few games have managed to do before it, OOTW succeeds in bringing an entirely new look and feel to video games. What looks deviously busy quickly turns into a brilliant excursion into great game play. Super execution and technique fill this cart from start to finish, mixing puzzles, action and adventure into one!

This game has a very good chance to be the most original video game of the year! The game plays well and offers more than just shooting as some of the situations require planning and strategy. The graphics have a look all to their own - something like a whole game made up of animated intermissions. Spectacular!

Totally original and totally awesome! The animations in this game are beyond any cinema intermissions I've seen, even on CD! There are many things to figure out in order to solve each scene. The sampled sound effects are amazing and add to the surreal environment. Once you've mastered it, play it again to show your friends.

Yes! Out of This World is spectacular! As a conversion from the Amiga smash hit, it does justice to the original, leaving few details out. The animation is smooth with little chopiness (surprising for a title in this generation of SNES software). The quest itself has some tricky situations which take real thought to conquer! Cool!

Hit the court with Magic Johnson's Super Slam Dunk. Choose from many top pro teams available in a free-for-all slam-fest! The court is viewed from a diagonal-view perspective to give you a clear view of all the action! You will need it, because your rival team can fool you with fake passes and back shots. Run to the net and perform one of three different shots, like slams and reverse double slams!

This game just doesn't have the legs to stand up against similar carts in the field. Although the game play does possess the most necessary elements of a basketball game, much of the detail (not to mention challenge in the versus computer mode) and finesse of basketball just can't be found.

The Super Nintendo is presently going through its basketball stage - almost everybody is doing a buckets game. This version would have been great 6 months ago, but now others have equalled the technology and gone beyond it. As it is, considering the competition, it is only average.

I was somewhat disappointed by this cart. The graphics are choppy and there is very little control over your team. For a 16-Bit game, the graphics are lacking and the sounds are not SNES quality. This is a nice try at making a basketball cart with a big name, but I found the game lacking in too many areas.

So far, very few sports titles seem to be working out on the SNES. Perhaps it is just too early for programmers to take on the tough task of creating a smooth sports game. Super Slam Dunk is okay, but suffers from so-so animation, so-so control, and so-so background sound effects. On the average, it's only average.

You have played the ultimate driving simulator in the arcade! Prepare yourself for the home version of Race Drivin! Everything has been included for your driving pleasure: four hot sports cars, three grueling tracks and hordes of tough opponents. Race on the Super Stunt Track and test your skill in the mountain or the devastating corkscrew loop! Watch out for computer cars that try to slam into you!

On the surface, this game does indeed pack the entire arcade experience into a four-meg cart. Unfortunately, with the lack of memory comes a lack of control and proper data updating. In the end, the game proves to be choppy and erratic, conveying none of the action or excitement of the arcade original.

This game had a lot of potential but it appears that too many compromises have had to have been made in getting it to fit in its present configuration. The game doesn't play well as the control is very difficult. It also plays slow and there is just no sensation of fast race drivin'. At best it is only average.

This is one of the choppiest drivers that I've seen on the SNES. After seeing how well the SNES can display polygon graphics, I was disturbed that this cart had so much lag time in the scaling of the graphics. The play control is very unsure, and even hitting the cow had as much fun. It's not the best translation of a great game.

Ouch! Race Drivin' just doesn't have the punch it should. I need a steering wheel and a strobe light to keep up with the frame-by-frame animation here! The scaling is almost non-existent and without a steering wheel, so is the control. Until such a peripheral comes out, I can't see spending big bucks for crash replays.

Based on the arcade hit, Cameltry, On the Ball is a game of skill in which you must guide a bouncing ball through a radical rotating maze! Sound simple? Not! The timer is your constant threat to success and it does not help much when you hit a '2-sec.' bumper! Four modes of play will challenge any opponent! Finish with time left over and it will be added to the next maze's time limit! Follow the arrows!

This is a brilliant combination of Marble Madness and Mode 7. The task of rolling the ball through a rotating maze is simple enough, but the rapid changes in the courses as well as the traps and pitfalls that must be expertly avoided, quickly tests the reflexes. One of the best games! Totally addicting!

Another new and innovative game! This one takes the special abilities of the Super NES (Mode 7) and utilizes them to the max! The control is precise and the screen rotation is excellent. As such, the game caught, and held, my attention for a long time. It does get very difficult and the later screens are nearly impossible!

An excellent re-vamping of an arcade favorite. The rotation is flawless and really shows what Mode 7 can do. The game play is solid old-school gaming, simple yet extremely fun to play. The game is very addicting and the 2-player match is welcome. The game has plenty of levels and lasting playability not found in most carts.

If you are one of those people who live in constant fear of becoming addicted to a video game, wait! On the Ball is nearly impossible to put down once you pick it up! The mazes can make you dizzy, and the challenge can make you sweat! Before you need an appointment to see a doctor, check out On the Ball!

Soccer has taken a 16-Bit charge! Super Soccer Champ brings top soccer action right into your home. There are sixteen available teams and ten devastating moves for each character! Try out the overhead kick, diving head block and volley kick to stop the ball, or take out your opponents with a punch, shoulder charge or jumping knee kick! If you would like a new theme to old soccer, then Super Soccer Champ is for you!

The execution in this cart is fairly straightforward, which makes the game more fun to play overall. Passing and shooting is controlled properly with a variety of shots at your disposal. The graphics are revolutionary in the same sense as other sports games, but they serve their purpose and deliver a nice simulation.

As a soccer simulation this cart is very good. Most of the moves are built in and this will appeal to the players who like this sport. The controls are excellent and in a fast paced game like this that is very important. The graphics are OK but one would think that more features could have been built in to add a little excitement.

This cart offers a solid but uneventful game of soccer. The playing is OK, and the game play is decent. The characters could of been a little more detailed and the sounds are average. If you're looking for a good soccer game that gives you the basics and nothing more, you've found it. Another average sports title for SNES.

Super Soccer Champ isn't too bad! Surprisingly, it is rather solid and smooth universally, but it lacks the many game play options of a great soccer game. I want to see more head butts, using saves, true stats and bicycle kicks to name a few. What about fighting? If you want good but noneventful game play, this is it.

Sega is releasing a hot action game based on the popular cartoon series. Taz is in search of a mysterious giant egg that could feed Taz's family for a year! Now, Taz has set his feeble mind to the task of braving the rough terrain and retrieving this special egg! Cartoon-like backdrops and sound effects heighten the overall game! Tazmania also features perfect animation to complement the game play!

Tazmania does a superb job of combining great graphics with varied and unique game play. The settings are your standard side-scrolling adventure, but the depth of play overshadows most similar titles. Each level contains plenty to explore as well as some of the most intriguing abilities you'll ever see!

Sega is definitely on the right track with this super cart! Not only will they capture the younger audience and their parents, but the better players will enjoy the challenge once they get through the easier levels. A very cute game that is well done. Lots of areas to explore and plenty of good plain fun!

This cart is great! The first few levels play like a kid's game, but as you progress the level of difficulty really takes off. Lots of techniques to master and great game play are pluses. The graphics are very cartoony and feature great animation. My only complaint is that the music (if you can call it that) really gets annoying.

Cute, real cute. Tazmania has extremely refreshing graphics that make you feel like you are playing a cartoon. Even though the main object seems to be "run as fast as you can to the end," Taz really packs a punch in the new genre of cartoon games. With considerably more enhanced sound effects, Taz would soar!

King Salmon is not just a typical day at the lake! This video fishing requires lots of forethought and technique to successfully catch a fish. Use various types of lure, change the depth of the line and pick plenty of spots to drop your line. Watch for other fisherman's boats, because if you collide with many times, you will be disqualified! If you manage to hook a fish, try using the pump method to nab the big one!

Like other fishing games, King Salmon displays the addictive features that have made similar titles on the 8-Bit systems some of the best ever made. Don't get me wrong, the pace here is leisurely and the action never really gets out-of-hand, but if you want an entertaining title that tests yourself, turn to the King.

There have been some OK fishing games done of some of the other systems but finally someone actually made a fishing simulation. This cart has it all! Don't expect a lot of action, but plan on a lot of hours of practice before you can find, and then hook, and then finally land the King Salmon. Tough, but the best there is!

Surprise! A fishing simulator can actually make a good game. The graphics are not phenomenal and the sounds are average, but the game play is interesting and has an addictive quality. Rolling along the lake in search of fish can be most relaxing! A nice change of pace in a world of shooters and fighting games.

Although not a graphics powerhouse (let alone a musical one), King Salmon has some addictive game play that makes it hard to put down. As the next in a line of fishing titles over the past year or two, King Salmon comes out on top with superb realism and funfulness to the sport. Let's see more games like this!

Right before Master Higgins was getting ready to marry his bride, an evil being decided to crash the party, kidnap the observing children and steal Master Higgin's future wife! Would he ever stand for that? No way! Introducing New Adventure Island. Master Higgins must face all new perils on this dangerous island. Pick up more weapons than ever before and prepare yourself for the adventure of a lifetime.

While this new Adventure Island entry does possess many of the most familiar elements of the previous titles, it still remains a worthy successor to the previous 8-Bit games. This card has crisper graphics and fluid animation throughout, combining with the proven play concepts that have made Adventure Island great.

A few more great games like this and the Turbo will really take off. Other than the new SNES cart, this is easily the best version of Adventure Island yet. The graphics are well done, the colors are bright and bold and the game play is exceptional. I can easily recommend this to all the Turbo users.

This is the action game that Turbo owners have been waiting for. The graphics are vivid and colorful and the animation is very good. The game controls are good, and there is plenty of action. The music and sounds are good. This card makes a great Turbo Express game for those who want action on the go!

Another Adventure Island game? Geez! It would appear that the Adventure Island world is growing faster than ever in this large quest for Master Higgins. Like the other games in the Adventure Island series, New Adventure Island is a rock-steady game that gamers will enjoy. This will keep Higgins fans happy for awhile.

Andro Dunos is the latest in side-scrolling shooters for the Neo-Geo. You are in command of a fighter that wields four weapon systems that can be powered-up multiple times! Plus, you can charge up each of the weapons to unleash a fury of death and destruction upon enemy squadrons! If you like huge bosses, Andro Dunos has plenty of them, each with their own bizarre attacks. The levels are huge as well!

While the Neo-Geo allows this cart to display some of the most spectacular graphics you can find in a home system, especially when it comes to the gigantic end-of-stage Bosses, the game play offers very few new concepts and the range of weapons is severely lacking. Not a bad game, just nothing revolutionary.

I was very impressed with the spectacular graphics in this game. If you have your system hooked up to a stereo then the audio will really rock, other than this it is a 'normal' Neo-Geo shooter with the standard amount of weapons and power-ups. Great end bosses and a difficulty set just right for the average player.

As a shooter fan, this cart kind of let me down. The graphics are good, but no better than a shooter of SNES. The music is pretty cool and sounds great in stereo. The power-ups are typical and aren't very exciting and the game play is O.K. The best thing about the game is the huge end bosses.

I am greatly disappointed in the Neo-Geo! For a "24-Bit" super system, it still has the formerly exclusive slow-down and flicker of the so-called "32-bit" systems. At \$200, Andro Dunos isn't very exciting. Granted, the graphics look extremely detailed and the music is great, but I want more. SNK can do better.

## GameBoy - Accolade

### CENTIPEDE

**Theme:** Shooter **Available:** Now  
**No. of Levels:** 10 **Megabits:** .25

Centipede has all the fun of the arcade version, but now it is portable! The object is simple. Shoot a crazed centipede in various parts of the body to change it into a mushroom. Watch for the spider that spastically jumps around and attacks, the flea that leaves a trail of mushrooms behind and the scorpion that poisons the centipede causing it to dive into you. Two players can combat the insects simultaneously.

This game does present a faithful reproduction of the arcade classic on the GameBoy screen. Unfortunately, the game play has become somewhat outdated, especially considering that a sequel has already been made. Nevertheless, this game is way too easy despite the haphazard controls.

Centipede was my favorite game when it first came out. While the GameBoy version offers die hard players like me something to do away from my NES, this version is not really up to what I expected. I found that the game is too easy and the control wasn't great. It still is a good cart because it is portable, it just isn't great.

This game has always been an old favorite. The game is perfect for the portable scene. Not very complex in game play, but solid fun nonetheless. The graphics aren't very impressive and there is occasional blurring, but other than that the game still plays great. How about doing Tempest or Defender next?

Centipede is always a great game, whether it's big or small. The GameBoy doesn't do it justice with consistent blurring, but it's still fun. My only question is, why bring out Centipede instead of the mega-hit Millipede? Perhaps the Centipede name is more common. Anyway, this is a good, solid game for GameBoy.

## GameBoy - Konami

### ZEN: INTERGALACTIC NINJA

**Theme:** Action **Available:** 1993  
**No. of Levels:** 5 **Megabits:** 1

Environmental games are making a strong appearance in the video gaming realm. Zen: Intergalactic Ninja is the latest one for the GameBoy! Select from four areas that include dust, smog, oil and a dam. Use your ninja power and might to overcome the environmental hazards and put a stop to the bosses producing this waste. The levels are intricate and difficult, but our world's fate is in your hands.

Beyond the environmental theme of this game, Zen really doesn't have the punch that Konami's Turtles games have shown in the past. The action moves at a very slow rate and the graphics, while not bad, aren't exactly the finest animations that the GB has displayed. Action fan or not, this game really wasn't that big a thrill.

The theme of the game is timely and when the comic books Zen could be a household word. The game plays OK but offers only the standard challenge. I would have hoped that Konami would have made this something special but, nevertheless what is there is all right but not spectacular.

Another environmental game? Give me a break! If the GameBoy was biodegradable, then I think it would make a difference. Besides that the game is very good for GB standards. The graphics are good and the game plays well. Its control is kind of like Strider, but you can't climb on the walls. A good GB cart.

Zen is a slightly above-average game for GameBoy which almost got my attention. It has many redeeming qualities, but I would like to see more action than jumping over pits, hitting enemies rapidly until they explode and slide under short passageways. Not enough action and few power-ups keeps Zen in the 6 range.

## Lynx - Atari

### STEEL TALONS

**Theme:** Simul. **Available:** Now  
**No. of Levels:** 12 **Megabits:** 2

Steel Talons is one of the hottest commodities at any arcade! Bring all of the action home on your Lynx! Control one of the most powerful choppers in the fleet on a mission to investigate enemy activity. You have an assortment of missiles and guns to use at your disposal if any activity gets a bit suspicious. The polygon graphics look like they are lifted right from the arcade. Check out Steel Talons for the Lynx!

Steel Talons is another attempt by a home system to replicate the look and feel of arcade hardware well beyond its capabilities. Rated against the coin-op, this game pales in comparison, but on its own the graphic and game play combination presented here are O.K., although not as visually expressive as the arcade.

While nothing on any system can ever capture the feel of the arcade game, Atari has done a marvelous job in recreating the concept of the coin-op. The game play is decent and very controllable although the scaling needed to make this a hit is beyond the capabilities of the system. Still, a game that should be tried!

Steel talons is a cool alternative to the typical portable game. The scaling and rotation isn't as smooth as expected but the effect of flying is still well done. The game play is choppy and gets repetitive rather easily. However I like the fact that Atari is doing more with the Lynx's abilities. Nice try!

For a portable system, the Lynx is certainly going places. Steel Talons doesn't have the scaling or smooth animation found in great simulators, but it is an excellent indication of where portable gaming is headed. Steel Talons needs a little work to become great, but I'm sure future versions will be awesome.

...CES Wrap-Up...SMSG Hardware News...Jaguar Update...Street Fighter 2 Products...Sonic Takes Over Sega...  
...Nintendo Grabs NCAA...Sega and Nintendo Drop Prices...New Games On the Way...

...Welcome one and all to the front line of video game warfare with the General of corporate destruction and video game views, the one and only Quartermann! The Q-Mann has pulled out the big guns this month, kiddies, to deliver a first-hand report from behind gaming's most dangerous lines! So put on your helmet and grab your joystick for all the classified info that only yours truly can deliver...System suicide! Nintendo has joined Sega in hacking the price of their main console under the 100 buck region! While the news of the price decrease from the Sega camp came after Nintendo's big news, the Q-Meister has discovered that Sega had their blueprints for the price drop ready well before the CES, with two new packages (a core system as well as the "Sonic" system which is presently being sold) set for store shelves this fall! The bigger news, however, is the fact that Nintendo's new specs, which include the base unit and one controller with no game, appear to absolutely destroy the future of the 8-Bit. Sure, we all know it had to go sooner or later, but was napalm necessary?...

...The quiet from the San Mateo Software Group was deafening at the CES. This company within a company, controlled principally by Electronic Arts, Matsushita and Warner Communications is set to unload with a machine that insiders are calling "revolutionary" early next year. The machine is CD-based, but according to sources familiar with the project, the entry level price will position the unit to go up against CD-I and CD-TV platforms as opposed to vids. Will consumers pay \$800 for a glorified game system? The Q-Mann says the SMSG best do some spectacular things to be that steep...Atari's Jaguar is now readying for full-out production, with designs for nearly two dozen softs now in the starting stages. The machine will take gamers into visual regions previously uncharted by home or arcade games! Can't wait to see this cat in action...

...A tip of the Q-Mann hat goes to Capcom for finally making some premo Street Fighter 2 products available! The T-Shirts, posters and hats are great, but collectors should stand ready to snap up Street Fighter 2 comics, cards and more! No word on release, but expect to hear it here first!...While we're on the subject of the kick butt fight-fest of the century, the Q-Mann has a bone to pick to the folks at Capcom! What happened to Sheng Long? Sure, we all knew it was the Dragon Punch, but what a disappointment to see the home version omit this most controversial of all non-existent game characters!...Also, don't be surprised if you see our friend Blanka at the next Weight Watchers meeting! Six foot-five and 216 pounds?! Get serious Capcom, this monster should tip the scales at 400 pounds!...

...Sonic the Hedgehog has taken over Sega! The Sonic developers, that is! Seems the boys responsible for the blurred blue one want to make absolutely positive that the sequel is just as super-charged as everyone expects it to be and Sonic has no plans to listen to any stiff white shirts! The Q-Mann's hat is off to you...Look for Virgin's 7th Guest CD-ROM tour-de-force to become the pack-in for Nintendo's upcoming CD system...Quartermann wishes to extend a warm welcome to the Game Doctor! Trust me, Doc, the surroundings are much nicer around here!...Nintendo scores the sports gaming coup of the year! One of the best b-ball games the guru of gossip has ever played, NCAA Basketball, is now being distributed by the marketing super machine at Nintendo. The folks at HAL and Sculptured Software should take a bow, this game blows away even the best the big 'N' itself could deliver...Market research? You guys are a joke!

...In closing, Gen. Q-Mann wishes to thank everyone who pushed through the crowds around the EGM booth at the CES to say "Hi!" and talk games! For those of you who weren't able to attend, the Q-Mann chalks up mighty kudos to this blistering batch of snazzy softs: Capcom's Street Fighter 2 (do you think I'm brain dead?), Sega's Sonic the Hedgehog 2 (the big loops and special pal are a very nice touch), Tecmo's NBA Basketball (love the Tootsie Rolls too, Dimitri), Nintendo's Mario Kart (nice twist on F-Zero) and Mario 2 for GameBoy (good action title for the small screen), Taito's On the Ball (I agree with the head ed, this is the perfect reflex tester), Konami's Axelay (took the cake in the shooter category) and Sunsoft's Superman (inside joke, inside joke). Actually Superman won't be ready to review until the next show but the demo looked great!...Until we meet again...

## GENESIS AND SUPER NES SELLING FOR \$99 STREET FIGHTER 2 SELLS OUT IN 1 HOUR C&L CONTROLS READIES SF2 CONTROLLER

At the January Consumer Electronics Show, both Nintendo and Sega announced that they were reducing the price of their 16 bit game systems to \$99! These prices would take effect on or around July 15, 1992.

This 'system war' (not unlike the airline industry ticket pricing war) has been going on for several months now with Nintendo and Sega each reacting to the other company's new monthly low price, and then each would quickly counter with something even lower. This system war has apparently reached rock bottom now, as the companies are at the point where they have to go in and physically change the system packaging to achieve this new low price.

Each company will now offer a new basic system package. This \$99 deal will not include a game with the system, and you will get only one controller. More expensive, step-up system packages will still be available should you want more than just the basic system.

Turbo Technologies is also in this 'war' as the basic Turbografx system will now sell for \$69. Sega's Game Gear has been repriced at \$99 and Atari has their Lynx at about \$70.

If you thought that Street Fighter 2 was eagerly anticipated in the U.S., you should see what it was like in Japan! We wanted to see for ourselves whether this phenomenon was truly worldwide, so the staff of EGM flew to Japan to be there when the cartridge came out on June 10th. Long lines of game players were expected at every store and rumors were circulating that the game would sell for over 200% list price, just because of the high demand for the cart.

As to the demand, the rumor was right. We got to the main store of Yodobashi Camera in Shinjuku (one of the largest in Japan) at 9:00 AM when the store was just opening up. The line for the game ran around the block! There was a stack of boxes of games up to the ceiling and they all sold out in less than one hour! To our surprise though, the game was even discounted 10% and our copy cost 8800¥ (about \$67). We then checked 37 other smaller stores across the Tokyo area and none had any Street Fighter 2 cartridges for sale. Apparently the smaller stores decided to avoid the long lines and had presold their entire allotment of cartridges. On the average, the typical player paid full price plus 200¥ or 10000¥. Now, will there be a similar demand when the U.S. version comes out?

A couple of months ago we predicted that Capcom wouldn't be the only company that would be releasing a Street Fighter 2, 6 button Super Nintendo controller. Sure enough, a new company, C & L Controls, out of Huntsville Alabama, is doing just that!

Tentatively called the 'Championship Joystick', this controller is huge and it is first quality all the way. It measures "in at 12 1/2" wide, 9" deep and 3 1/2" thick. The controller retains the exact same button/stick configuration as the arcade setup. The company claims that it is the most rugged in the industry, and we have to agree that it certainly could take a beating. Anything that could survive a couple of weeks of hard abuse from our players has to be strong! Actually the controller case is made out of cyclite - the same stuff that telephones are made out of! The other parts of the controller are equally as durable. The buttons are the same ones that are used on the arcade game, as is the joystick. That means cherry microswitches, the industry standard, for quality and reliability!

C & L is gearing up for production and plans to have the stick available in early August. They are shooting for a retail price under \$70. For more info you can write to: C & L Controllers; 4800 Whitesburg Drive; Suite 29; Huntsville, Alabama, 35802.

Both Sega and Nintendo dropped the price of their 16 bit machines to \$99 in July.

Hundreds of eager players (including EGM) lined up at 9 AM on June 10th in order to buy SF2 in Tokyo.

C&L's new Street Fighter 2 controller (in prototype form) will sell for under \$70 and come out next month!

# THE GAME DOCTOR

## New Vistas in Problem Solving

Welcome, game mavens, to EGM's first installment of The Game Doctor's Q&A. For those of you who may not have heard of the Game Doctor - I know, I know, but we at least have to try to pretend that some of you are new to this column - I am the original video game medic, having started my "Q&A" practice in the October '81 issue of the first electronic gaming magazine. Since then, I've been associated continuously with Arnie Katz, Bill Kunkel and Joyce Worley as they migrated from magazine to magazine, looking for the home they finally appear to have found with Steve Harris and company. It is a distinct honor to now be appearing in The Game Doctor's Q&A for EGM. Every column will, of course, be slanted toward the interests of the type of players who read this fine magazine.

Oh, but first the ground rules: 1) Make sure your name and address is on both the envelope and the letter itself, in case we lose the envelope; 2) No hint or tip questions, though - the Doc leaves that item to the experts who produce the rest of this magazine.

So, let's begin our latest leg in what has been a decade-long odyssey through the world of electronic entertainment with some of your burning questions.

**Q:** I am a proud owner of an NES. I only have one major problem. I was playing a game and there were a lot of enemies of the screen. The action on the screen then started to slow down. Can you tell me what caused this and why this happened?

**Brad Gerard**  
Ruffin, South Carolina

**A:** No problema. The more on-screen objects, the more memory is required to move them around. Most video game systems use what are called "sprites" as the characters and objects which actually move on screen against a variety of painted backgrounds, much in the way cartoon characters are painted on transparent media, then animated against a static background.

Now we get to the difference between an 8-Bit and a 16-Bit machine. An 8-Bit machine can only "bite" off 8-Bits worth of memory at a time while a 16-Bit machine can consume twice as much. The bigger the "mouthful" the system can gulp down, the smoother the animation and the more animated objects can be manipulated simultaneously on screen without noticeably slowing down the game.

**Q:** Here are a few questions I would like for you to answer: 1) Is the Mega-CD worth all that money? 2) Are there any Mega-CD titles like Sherlock Holmes in which they use real motion scenes? 3) I beat video games very, very easily. Would you think that there is any chance I could get a job as a game reviewer, tester, counselor, etc.? Any advice would be greatly appreciated.

**Shawn Emery**  
Elizabethtown, KY

**A:** Here's a few answers, Shawn: 1) There are certain questions which cannot be answered. Among them are "Is Video Game System 'A' worth the money?" There is just too much relativity in there, partner. Worth the money to you? Well, since I am privy to neither your bank balance nor taste in electronic hard and software, I just can't answer that. I will say that the software selection for the CD unit - which is not even available for the

Genesis as I write this - is limited at best and a wasteland at worst. Wait for the Genesis CD to come along, and then see what the library looks like and you will instantly know for yourself whether it cuts the economic mustard. 2) I am certain that some form of "full motion video," as it is known, will be available for Sega's CD games. After all, even the TurboGrafx-16 can now produce full-motion video (and the Doc did see a few interesting looking new CD titles for the Turbo at CES, by the way) and Phillips will be loading up its CD-I (Interactive CD as opposed to CD-ROM, which is a play-back-only system) software with full-motion video out the wazoo. So, simply in order to keep up with the competition, it seems inevitable that the Genesis CD will give you all the full motion video your little gaming heart desires. 3) As you might suspect, there are an awful lot of game fans who would love to become game testers, and if you're as good as you say, you might have a shot. There's only one drawback: you have to live within commuting distance of a software or software testing company. Living in the state of Washington, for example, would make getting a job with Nintendo a lot easier, as would living in the Silicon Valley area of California, where you can't swing a broken joystick without hitting a software developer. But don't give up; some unlikely cities do boast software companies - Austin, TX has Origin, Las Vegas has Westwood, etc. - so check your phone book and if you find a game company listed, give 'em a call and say the Game Doctor sent ya!

**A:** According to Galoob, there is no way their Genesis Genie could harm your hardware or software. Remember, unlike the Nes Genie, the Genesis version will be an officially licensed product and will have the blessing of Sega. In fact, they say that the physical configuration of the Genesis actually makes it easier for them to affix the Genie to a cartridge, since there's no door to lift up. The Genesis Genie will basically look like a big Genesis cart onto which you attach your software. Everything then easily inserts into the top-loading system.

**Q:** I have some questions about the Genesis. I've heard that it can be hooked up to an RGB computer monitor. Is this true? If so, how do you do it?

**Dan Johnson  
Ogilvie, MN**

**A:** Several companies make cables which allow this conversion. The one which makes the best cables for both the Super Nintendo and Genesis game systems is Redmond Cable. You can call them at (206-883-1403). They can tell you what is available for the monitor that you are using. Tell them that the Game Doctor sent you!

**Q:** I recently saw an ad for the Master Gear which converts Sega Master System games to the Game Gear format. I was wondering how good it really was?

**Chris Stehle  
Milwaukee, WI**

**A:** The Master Gear was made by a small company and created enough interest among users (and is such a great idea) that Sega itself has since purchased the rights to this device, redubbing it the Master Gear Converter. We've yet to see whether the same problems will afflict the MGC that continue to make many Turbo/Turbo Express games tough to play on the smaller system, such as text that is so small that is unreadable or scores and other information located along the outer edge of the screen tending to be cut off on the smaller monitors.

**Q:** I live in Asia and would like to buy Sega's Mega Drive game system. You said that a Mega Drive cartridge would be too big to fit in the Genesis cartridge slot. Would the opposite also be true? Would there be any modifications [required] if a Genesis game were to be used in a Mega Drive system? If so, what should I do?

**Grean Goblin  
Bangkok, Thailand**

**A:** Good question, Grean Machine, which provides the perfect time to mention that the best letter in each Q&A column wins the writer a Game Doctor Gee-Gaw Surprise Package (a.k.a. the GDGGSP). It's a collection of the pins, tee shirts, posters and other items which kind exhibitors at CES pass on to the Doc to distribute among his patients. Sort of like the lollipop the doctor used to give you if you behaved properly during your physical examination. The Goblinman's package is already on its way and YOU could be next.

Now to the more problematic issue of actually answering his question. Okay, here's a brief rundown of the compatibility/non-compatibility issue by way of the popular Japanese and American sister systems:

Genesis to Mega - U.S. carts fit both machine, but the Mega carts are slightly wider, which means to play them on your Genesis, you would have to cut away some of the plastic at both ends of the cartridge slot.

Super-Famicom to Super-NES - There is a pair of prongs in the American system which keep the Japanese carts from fitting in. We have encouraging reports from some brave American gamers who have removed these lips with pliers and are now playing Super-Fam games.

The Super-Fam, on the other hand, has some very sturdy blockage to prevent the use of American games. Buy an adapter, it's a lot easier. Although both TurboGrafx-16 and PC Engine game chips look identical, three of the pins are different. Again, use a converter. However, remember that some converters require extremely delicate handling, so check with your retailer.

U.S. and Japanese GameBoys are seemingly identical, though the system runs a check to determine whether the system is American or Japanese, which brings up an interesting point.

Some companies have begun to install system discretion jumpers (such as Rolling Thunder 2 from Namco) which detect any attempt to use a Japanese game in a U.S. system and a Yankee cart in a Nipponese system. If you know what you're doing, you can reset the jumpers, but very few gamers will possess sufficient expertise to do so. Nonetheless, I suspect the word will get around.

.....  
**Q&A QUICKIES:** To all those folks who wrote in complaining about the aim on their Super-NES Super Scope light guns, the trick is in setting the parameters correctly before playing. The system asks you to line up the center of the screen, upper right corner, etc. Now, if you aim at the upper right corner when the system is looking for the center of the screen, you're going to confuse the poor thing to no end. So, take care in setting it up originally and you shouldn't have any problems. Oh, and for all those folks who were alarmed by the TV ad's claim that it could focus down to "a single pixel", stand at ease. True, the system can focus on a single pixel, but software designers figured out pretty quickly that no one can hit a single pixel. The developers therefore build in a certain tolerance so that if you hit within, for example, 8-12 pixels from the target, the shot will still be considered on cue. Some designers are more liberal than others, so some games will require greater marksmanship. And that about wraps things up here at the Game Doctor's new office. Hope you enjoyed this introductory column and remember to send all queries, comments and criticisms (we appreciate any corrections, especially those that aren't overly snide) to:

Seems some morbid folks are calling the new domestic robot they've designed "THE RIPPER," due to a nasty little defect - this robot likes to kill.

Once it was accident that the UCC happened to create a genetically engineered killing machine who also happens to have an insatiable appetite for human beings.

Translated from the number one European hit, CORPORATION, you're the CYBERCOP who's been chosen by the government to crack the complex security system of the UCC. Your mission: confront the mutant robot they've designed as the ultimate weapon.

Just remember CYBERCOP: you're completely on your own. Of course, you'll arm yourself with a whole arsenal of fire power - everything from helicopter projectors to infra red image intensifiers.

If all goes well, you'll be a national hero. But if the grid guards, sleeping gas and airtight doors get the best of you - even your mom will deny that she ever knew you!

### GENESIS GOES SUPER SONIC AGAIN!

The world's fastest video game character is back and he's even faster than ever! Sonic made his debut last year on the Genesis and took the video game world by storm. The little blue hedgehog, capable of mind-blowing speeds and incredible moves, sent Genesis to the top of the video game market. Sonic even won the coveted title of Video Game of the Year by none other than Electronic Gaming Monthly. Now, the same development team that created the first blockbuster cart is working on the sequel. This cart promises to have even more action, enemies and levels. Sonic's maximum speed will be even higher than the first cart. One of the main features of this new cart is the addition of a character known as Tails. Tails is a little fox with two tails. He likes to mimic all of Sonic's moves. He doesn't quite have Sonic's speed, but for a 4 1/2-year-old, he learns quick. He may even be faster than Sonic someday! The great part about Tails is that he brings the

option of having two players to Sonic's game. The game will be split into almost 35 levels and will feature time travel. Sonic and Tails will venture through prehistoric swamplands and futuristic cities filled with pollution. Electronic Gaming Monthly is here with the first in-depth look at this great cart, so check out the next few pages for the inside scoop on Sonic 2.

## SONIC

Sonic has been working out and he's super-fast. He's about 16 years old now, and his attitude is getting worse: he's a lead foot and he doesn't even have a driver's license! He's gotten so fast that he can even travel through time!

## TAILS

Tails is a unique little fox. His two tails always seem to get in the way when he tries to mimic Sonic's fast-blast take off. He idolizes Sonic and follows him wherever he goes. For 4 1/2, he sure is fast. I wonder if he'll ever be faster than Sonic?

## DR. ROBOTNIK

Dr. Robotnik is back with more dirty tricks up his sleeves. After he was thwarted by Sonic in the first adventure, he has since created a whole new army of robot creatures. His master creation is the monstrous "Death Egg."

Here's the awesome new title screen with Sonic and Tails.

"I decided that since I've become the mega-star that I am, I should share a little of the fame with my buddy, Tails. He even got to share my title screen with me - what a lucky break! I hope he can keep up with me in the game. There are many new tricks to master. Check out the corkscrew loop! Betcha can't do that with a chubby Italian plumber!"

## **MORE LEVELS, MORE ENEMIES, MORE FUN!**

Sonic 2 is, without a doubt, going to be one of the greatest action carts for the Genesis. There will be many new aspects to the game play. The developers of the game are keeping the contents of the game under the highest security though. One of the game play elements that we are excited about is Sonic's ability to travel through time when he reaches warp-sonic speed. We don't know exactly where or how Sonic is going to travel through time, but prehistoric and futuristic levels are a must. Sonic may do super spins over the back of a brontosaurus or zip through the tubes of some futuristic robot factory. The last level will be a battle against Dr. Robotnik and his hideous Death Egg. The Death Egg is an immense star-like fortress and has the ability to destroy Sonic's entire home planet. The background graphics will be even better than before, with tons of parallax scrolling and plenty of ultra-high-speed action. The two-player option also adds to the playability. Look for this hot cart to be released in November 1992. Sonic 2 is shaping up to be quite a sizzler!

# SONIC 2 ON SEGA CD!

Here are a few of the fantastic intermissions for the Sonic 2 CD that Sega showed at the Summer CES in Chicago. The Sega CD version is said to be almost identical to the cart, but features CD quality music tracks, sound effects and excellent cartoon-like intermissions. These screens are from a demo and may not appear in the final Sega CD version of Sonic 2.

# SONIC 2 ON SEGA CD!

Sonic is also making a second appearance on the Game Gear. Now, you can bring Sonic's new adventure wherever you go. This second cart will feature more rings to collect, animal friends to rescue and different ways to play. Some of the levels feature Sonic hang gliding through the skies and others have him racing rail carts in underground tunnels. The game

play is much faster than the first and there are loops and springboards throughout the game's weird and wacky levels. Look for this hot cart during the Christmas shopping season!

## ATTACK ME IF YOU DARE!

Street Fighter II hits the streets packed with the closest arcade-to-home translations ever seen. Here are some of the features of the home version, and some comparisons between it and the arcade.

All eight of the original World Warriors have been retained from the arcade hit with regular and special moves intact.

## ALL THE STAGES ARE INTACT!!!

A classic match-up between Ryu and Ken. The parallax scrolling on the floor is smooth throughout; however, the clouds do not parallax scroll like in the arcade. The signs break when you throw your opponent into them, just like the arcade version.

In the Option Mode you can customize the game to suit your needs. The level of difficulty for the computer can be adjusted from 0-7 and the time limit can be turned off. Because no two gamers were created equal there is a button configuration option. There is also a sound and music test which can be listened to in stereo or mono.

In the versus mode, you can choose from all the stages and also select different handicaps.

Here you can see Honda keeping Ken away with a lightning hand special attack. This stage has remained the same as the arcade, except the water does not overflow from the bath during the game. Instead, you will see the water drip from the ceiling onto the ground.

Blanka's stage is still one of the most graphically intense levels in the game. All the background animation is the same, although a few of the spectators are missing in this version and the people in the house do not animate. Blanka is countering Ken's dragon punch with a shock.

Ken and Ryu battle it out once again, this time on Ken's home turf. The classic harbor scene has been translated almost perfectly, lacking only the wave action in the water and some animation in the characters. The barrels can be broken by throwing your opponent into them.

Mister Special Forces himself is back. That's right, Guile is here and he's tougher than ever. His level remains unchanged. However, one major thing we noticed is that the well-known handcuff and freeze tricks do not work on this version.

On to China, where Chun Li awaits. In the market scene, you will come face-to-face with the strongest woman in the world (or so she says). This cart provides great animation of the background characters, especially the people on the bikes. Amazingly, there is no slowdown!

Zangief dodges Ken's fireball and gives him a nice wake-up call with his right fist. His level remains almost entirely the same, except for some minute detail and animation associated with the rowdy group of spectators. He can be a pretty tough customer, so stay on your toes!

Dhalsim's stage in India has to be the most animated level in the arcade, and it is in the home version as well. This stage did suffer the loss of two elephants (probably due to slowdown) - now, only four elephants are seen. Also, the elephants don't make any noise.

## MEGA-CHALLENGE!

Space Megaforce for the Super NES has to be one of the most intense shooters to appear for any system. This action-packed game

has twelve intense levels! Most shooters only have about six. In addition to all those levels, there are also eight weapons and six power levels for each weapon. If your weapon is powered-up and you are

hit by an enemy, you will not die. You'll just lose the power level of the weapon! Your ship also has a super bomb capability that destroys all the enemies on the screen. Are you up to the mega-challenge of a lifetime?

# MEGA-LEVELS!

## LEVEL ONE

Level one is just an example of things to come from this shooter. Space Megaforce uses the Super Nintendo's scaling and rotating capabilities to the max, with absolutely no slowdown. Talk about intense action!

## LEVEL TWO

Level two gives a whole new perspective on scaling and rotation via Super NES's mode 7. The entire space station in background of this level will scale and rotate towards you as you continue fighting! These effects really are incredible!

## LEVEL THREE

Level three is the first short level of the game, meaning that there is no boss at the end - just a mini-boss. These levels are just a transition between the larger levels, but don't let that fool you! They can be just as deadly.

## LEVEL FOUR

If this level doesn't make you sick, nothing will. The entire background seems liquefied as it sways back and forth, utilizing a wave scrolling capability unique only to the Super Nes. This could be one of the best levels in the game!

## LEVEL FIVE

Patience is a virtue, and you must have plenty of it in level five. You must be cautious here, because this level is not an easy, straight line, but an intricate pattern of rock formations. In certain areas, you must wait for the rocks to be cleared out.

## LEVEL SIX

Level six is the second of the short levels. Here, the object is to simply destroy everything in sight! You'll score huge points if you accomplish this. There are also plenty of power-up items and free guys hidden in this level.

## Who is PAN?

Peter Banning has no memory of his childhood, despite the grand adventures he enjoyed. One night, Peter was visiting his stepmother Wendy with his children. The children asked about Pan, the mysterious boy who Grandma Wendy insists was real. Peter denied the story and his destiny...

That night, a crash echoed through the house! When Peter went to investigate, his children were gone! A twinkling light at the window proved to be Tink, a.k.a. Tinkerbell, a pixie girl of his childhood. She gathered up Peter and explained how Captain Hook had taken his children. Peter had stumbled onto the lost memories of years past and the greatest adventure of his life.

As the Pan, you must reclaim your position as the leader of the Lost Boys. Rufio has led the Lost Boys

for years, and will fight you to prove your unworthiness. If you win, you get the Golden Pan Sword, plus a long range attack. Unfortunately, after being hurt, Pan loses the sword until he can find it later.

On the Super NES, Hook takes on a life of its own based on the hit movie. You'll encounter numerous

*Peter Banning comforts his children before the kidnapping.*

pirates fighting with conventional weapons like arrows and swords, but you will also face the elusive balloon pirates as well. Along the way, Tinkerbell will appear to shower you in Pixie Dust, the only way Peter can fly now that he is older.

Peter Pan is out of shape, but his spirit is just as strong as ever. Accompanied by powerful 16-bit orchestrated sounds, Super NES Hook really gives you the feeling of playing the movie. You must travel all throughout Neverland in your quest to save your children, and along the way you must pick up the invaluable items to help you against the most evil man around, Captain Hook.

One handy tip is to immediately look for the 1up loops scattered throughout the game. A 3up lies near the end of Level One, so you can quickly stock up on lives. Keep an eye out for these! Good luck!!

*Learn to use Pan's long jump by holding down the Y button. You will save pixie dust this way.*

*If you see Tinkerbell, stock up on pixie dust. She will be on hand for the times you need to fly high.*

*The 3up is hidden in a spiked cavern near Rufio. If you are a skilled flier, you can reach it.*

## the NEVERTREE

The Nevertree is the home and haven for the group of young known as the Lost Boys. As Peter Pan, you too had frolicked in its safe limbs. Now, however, you are grown up, and the Lost do not believe who you are. They decide to put you to the test: you must battle your way to Rufio, and fight for the Golden Pan Sword!

Rufio is a skilled fighter and truly deserves the mantle of leader, but you are the Pan, and no one can defeat you! Besides, you need Rufio's help and respect if you want to save your children, Maggie and Jack. Look for the 3up loop near the end of the level. Stock up on lives before you head on to fight Rufio for the sword. Here's a clue, you can only reach the 3up with Tinkerbell's pixie dust for flight...

*Rufio will stop at nothing to defeat you. You only need to jump when he charges and then...*

*...quickly turn around while Rufio gets his bearings straight looking for you, then finally...*

*...strike him with all your heart! The sword will surely be yours. Repeat this two more times.*

Now that you have your Golden Sword, attack from a distance and a ball of stars will shoot forth.

Beware of the bee hives scattered everywhere. If you disturb the bees, they will hunt you down.

## NEVERLAND FOREST

Did you stock up on lives first? You should hope so when you travel this forest level. The forest is patrolled by pirates from start to finish. They won't leave their posts, though, so you can avoid most of the dangerous spots. If you get caught between arrow-toting pirates, don't worry! You can slash the arrows right out of the air if you are fast enough. Your biggest threat will be the numerous bee hives, bats, and bottomless pits.

If you do decide to take a dangerous route through the forest, you can recover life by defeating certain pirates. Some pirates even carry 1ups! Always look for cherries and apples as you travel, and, most importantly, search for the Life Leaves. You must have them all to defeat Captain James Hook!

A Leaf is hidden near the beginning of the Neverland Forest. Climb the tree limbs and go back.

Holy cow! The trees are alive! The pirates of the forest have set a grand trap for Pan. Be on alert.

As the acorns fall, prepare for the boxing gloves to appear from most of the knot holes.

If you can find the pirate controlling the gloves and hit him, you will be free to continue on.

# CHUCK ROCK™

*The belly-bash technique requires a lot of timing or you'll miss and be trounced! Chuck's range isn't very good, but he can pack quite a wallop this way!*

*Chuck's favorite technique is rock-tossing. This is a long range attack, and can be particularly deadly to prehistoric animals. They also set off traps!*

*Chuck really doesn't like to swim because of its similarity to bathing. Still, Ophelia is his woman, and there is nothing Chuck won't do to save her!*

*Chuck never learned what odor-eaters were, so his jump kick is feared throughout the land. One quick swipe of his deadly digits is enough to knock most foes out!*

## ROCK -N- ROLL!

Chuck isn't your ordinary run-of-the-mill caveman. He has a beautiful wife named Ophelia, who loves to do nothing more than her usual boring chores. Gary Gritter is a pebble-chewing, wife-snatching caveman, and one day, he kidnapped Ophelia! Meanwhile, Chuck was busy watching television. Once he noticed Ophelia's disappearance, Chuck made a quick search for some clues. With nothing but his beer-belly bash, rock-tossing torso, and his deadly size 14 feet (phew!), Chuck set out for the greatest adventure of his life.

As Chuck, you get to follow the humorous happenings of the most unorthodox hero ever! Chuck can do many things like walk, jump, swim, pick up and throw rocks, belly-bash enemies, and use a powerful jumping odor kick. Throughout all 25 dangerous areas, Chuck will be faced with entertaining puzzles and traps. Just how do you use that boulder sitting over there? Is it really safe to walk underneath a large dinosaur? Prepare to find out! Only Chuck Rock can save Ophelia!

*In Chuck Rock, not only do you get to play a challenging quest, you get to view the most hilarious animations ever in a video game! Chuck yawns, scratches, and gets scared white! His eyes bug out, he swims like a dog, and even his ghost will have you rolling in your seat! Also, keep a close eye on the background and enemy characters. They all have a special life of their own, complete with the best 16-bit can offer. One word of warning, though; don't judge a creature by its size!*

*Level One is the perfect place to practice all of your hardest techniques. Becoming an accurate rock-tosser and belly-basher is the key to success. The dinosaur waiting at the end of Level One will simply charge back and forth. The left ledge is a place of safety, so toss the rock from it.*

*Level Two has a few more obstacles to overcome, but the principles from Level One still apply here. Avoid the boogie men hidden under certain dirt piles. You cannot destroy them, so just take care to run past them. Look for a rolled up snake and try tossing a rock on it!*

*Level Three is far more dangerous than Level Two just because of the water everywhere. Traveling can be difficult if you don't learn the basics of grabbing a breath now and then. The sea dino at the end tosses out enemies and acidic bubbles while you try to kick its face!*

# Equinox™

**Coming Soon  
For Your  
Super NES!!!**

## SORCERY!

Shadax, the great wizard of Solstice, had defeated Melkior five years ago, and ever since, Galadonia prospered in peace. Glendaal, the son of Shadax and Princess Elanor, did not appear to possess any qualities of a great wizard. Thus, Shadax left Galadonia to tutor a young girl from the north with strong magical powers. Glendaal continued his studies hoping that he would become a master magician.

One evening, Glendaal was staring out at the evening skies when a massive magical storm rolled in from the north of such magnitude that it rivaled Melkior's evil power. The next morning, Glendaal awoke to a horrible sight: the entire town had been transformed into rubble, and the villagers mutated into zombies and demons! Fearing the worst, Glendaal set out to search for his father...

Equinox is a 3-dimensional game that takes the player through eight intense dungeons filled with traps, money, monsters, and items. As the player progresses, he can learn new spells, pick up new weapons, and increase his stamina. Equinox involves two main areas: the overworld and the dungeon perspective. In the overworld, you can rotate the map and move forward to the area you wish to travel. In the dungeon scenes, you must move from room to room, searching for the mystical tokens that will let you finish the level. All perspectives are in 3-D, with brilliant colors and sharp graphics. Add the digital soundtrack, and you've got a game that can blast past the rest!

*The overworld map is large and filled with danger. Select your options and proceed into the quest with earnest.*

*Once in the overworld, creatures will attack you from wells, clouds, and other strange places. Wander until you find the dungeon.*

*The overworld rotates as you push left or right. Utilizing the awesome Super NES Mode 7, this is realism at its best.*

*By using the jump button, you will be able to cross small rivers and avoid certain monsters in the overworld. Be careful!*

The first dungeon is filled with ghosts. Knock them out with a few well-timed hits and move on to the next room.

The search for the mystical tokens is an ongoing quest in each dungeon. Without them, you cannot fight the level boss.

Your main enemy throughout the game will be numerous spikes surrounding the most delicate areas of a dungeon.

The second dungeon is a labyrinth loaded with enemies and traps galore! Your search for the tokens is a rough task indeed.

The wind demons in the third dungeon will charge at you if you leap down to their level. Avoid them at all costs.

The flooded dungeon gives you increased jumping power, but that can be a hindrance if you don't watch where you leap.

# SMARTBALL™

*Pushing up on the control will make Jerry stretch up. Jerry can hit enemies above him this way.*

*By pushing down, Jerry will flatten, knocking any critters to the side and avoiding high attacks.*

## HE'S NO DUMMY!

Jerry was a fine young prince in the land of Kyliria, a place of peace and prosperity. His father, King Goeffrey, will soon pass the crown to Jerry, but his younger brother Tom is jealous. Tom hires the Black Wizard to place a curse on Jerry and steal his new bride, Wendy. Now Jerry is trapped in the form of a small blue ball, with nothing left of his humanity except his intelligence.

In this grand Super NES adventure, you play the part of Jerry, a smart ball capable of many things. In this form, Jerry can move, stretch, flatten, jump, swim, collect objects, throw balls, and climb steep walls and ceilings. Along the way, Jerry can find seeds to create a vine that will take Jerry to new and exciting heights. Throughout the game, Jerry will only be able to access certain areas by squeezing down narrow pipes. By utilizing these passageways and all of the formidable power ups scattered here and there, Jerry might just be able to rescue Wendy and defeat the Black Wizard!

Some of the special items in Smart Ball are found in hard to reach places. Sometimes a seed or ledge is needed to jump to an important item. Most items, like life containers and red balls, are found in the Eternal Flowers. These plants are the key to Jerry's quest! Play ball!

*Jerry can squeeze down pipes to check out new areas inaccessible to normal humans. Many items are probably hidden here.*

*The red balls are found mainly in the Eternal Flowers and can be thrown at distant enemies.*

*When Jerry's life is full, the red balls turn into bombs that can really send foes flying!*

The most important skill to learn is climbing! By holding down the X or Y button, Jerry will run fast and stick to any walls he comes in contact with. This includes ceilings, too! It may be better to leave these buttons held at all times.

Stage 1-1 is really simple, and should be used to test Jerry's new powers. Collect the red balls.

Stage 1-2 is the place where you encounter your first boss. Duck low and use the flatten technique.

Stage 2-1 is a large pipe maze (filled with mice and flames). Take it slow and easy to finish.

In Stage 2-2, you will fight against a flock of birds and fish. Use the Iron Ball to knock them cold.

If Jerry needs a quick supply of lives, he can look for the letters that spell J-E-R-R-Y in order. This will give Jerry two free lives. If you don't collect them in order, Jerry will only receive one free life. Find them all!

# EXTRA INNINGS™

## BATTER UP!

For the past ten years, game companies have been attempting to make the dream baseball game of the decade, but somehow, each title has fallen short of the mark. Now, with the highly advanced 16-bit technology at their fingertips, Sony Imagesoft has created the ultimate baseball simulator, Extra Innings for the Super Nintendo Entertainment System! This powerhouse baseball game incorporates a full range of 12 standard teams, plus two that you can create yourself. Every player has real statistics that affect the way he plays on offense and defense. Some players are outright power-hit-

*Don't lead off too far, or you will be picked off by a quick pitcher!*

*The forkball is extremely hard to hit, but it wears pitchers down.*

*Pick from the three stadiums with different shapes and sizes!*

ters, some are base-stealers, others are all-around players who can't seem to do anything wrong.

Extra Innings has the largest number of options available for a baseball game. You can choose from three fields: the Air Dome, a stadium with high winds; the Midsized Park, a smaller stadium known for the number of homeruns it surrenders; and the Huge Stadium, a large stadium where fielding is the key to victory. Your players are divided into three groups: Starters, Bench, and Farm. Farm players cannot play during the game, but they can be moved to the bench for other games. Pick your starters carefully from the Starters and Bench. The player condition

*Smack a home run, and you will be greeted by your adoring fans.*

symbols tell the story about a player's playability.

When you are on the field, your options are still numerous. On defense, you can make diving and jumping catches, throw 5 different pitches, pick off base runners, and substitute players. On offense, you can hit, bunt, steal a base, hold base runners, lead off, and select a pinch hitter! One interesting option for the defense is to make the pitcher wipe his brow. This normally signifies a tired pitcher, but can be done manually to fool the batter. Few baseball games have any strategy involved, but this type of flexibility will certainly drive many games into Extra Innings!

*The outfield can be set to automatic play for better fielding.*

*After hitting the ball, you will switch to the overhead view.*

The two cave dudes with an attitude are back in 8-Bit form on the NES! With them are the Neanderthal knuckleheads that have stolen the cave women! To get them back, you must go it alone as either Joe or Mac. On your way, there will be many obstacles to overcome. The levels include tons of pterodactyls, moving bushes, rolling rocks, baby dinos and incredible bosses. In fact, there are two bosses for each level! While running through each stage, you can use your weapon to get rid of any foes that may be unfortunate

enough to get in your way. Starting out with the stone hammer, you can take out enemies with ease. But, as the action increases, you will need to increase your weapon power. Find cavemen that carry large eggs. When you hit them, they will drop a weapon. The arrowhead is the weakest and has a short range. The boomerang is fast and moderately powerful. The stone wheel can go long distances and is a very powerful weapon. When you defeat the second boss of each level, you will free one of the cave babes. You must hurry! They are depending on you to save them!

The second level of Global Gladiators™ is the forest, where you must kill mean-spirited creatures!

You will get an awesome view of the forest and good points if you take time to climb the trees!

Slime covers the first level of Global Gladiators™. Disperse the slime monsters with your gun!

Spitting squirrels and walking axes are just some of the creatures one finds in the forest!

This is the toxic city level where you must put out fires and traverse steel beam pathways!

Right back with  
Mick and Mack!

McDonald's and Virgin have come together to bring us Mick and Mack™, the Global Gladiators™!

They fight gook and gunk anywhere it might linger, from the jungle to the city or the forest to the antarctic. With your help, Mick and Mack will clean up the world! You even get a chance to test your recycling reflexes.

You start in the jungle fighting slime creatures, and then move into the forest where you battle spitting squirrels, walking axes and other bizarre creatures. This leads you to the toxic city where fireballs roam the half-completed building sights looking to fry any careless gladiators. Then, it's off to the arctic zone where paths of ice and snow are slick and dangerous - but someone has to clean up the oil spills!

Mick and Mack™, the Global Gladiators™, are sure to be a big hit among the younger crowd. Clean up your act with Mick and Mack™!

There are many beautiful waterfalls, but look out! They mean instant death. Chain saw alert!

In the city, you will find conveyor belts. They are only dangerous to the unobservant.

*In the toxic city, you'll find some artists who leave behind graffiti calling cards!*

*Welcome to the arctic zone! Here you must travel over icy pathways and platforms. Don't run, or else!*

*This is a view of the bonus world behind the bonus level. As you can see, it needs a lot of cleaning!*

*If you take a look at the "big picture" above, you will see the first little bit of level one! This place is incredibly large, with a lot of tricky jumps and fights. It is also filled with destructive slime junk all along the bottom. Terrible glop machines are everywhere, spewing out tons of slime. There is also a good supply of spitting slime monsters and rolling slime balls! (Psst! Be alert for some secret platforms!)*

*See what happens? If you intend to live, walking is the only way to get around in this zone.*

*It seems some pretty big animals used to roam the bonus world! Better keep an eye out for them!*

*Just look at this environmental destruction. You'd better get busy and clean up the world!*

*The bonus level challenges you to put the falling trash into the correct recycling bin. Good luck!*

*Even in the bonus world, the horrible glop machines pollute the environment!*

## It's time to fight...

Jimmy and Billy Lee are on a new quest that will take them across the world. It has been two years since the last fight, and they have been working on their martial arts techniques. The two brothers were approached by an old gypsy fortune teller, who spoke of the ultimate fighter. To get to him, they will have to retrieve the three sacred Rosetta stones. Thus, their journey for the stones began.

Double Dragon III for GameBoy retains all the action found in the NES version. Powerful moves abound, such as the awesome cyclone kick. You can even find shops to increase your powerful arsenal! You'll need all the help you can get, because the enemy attacks are relentless. Can you become the greatest fighter in the world?

# ULTIMA®

## RUNES OF VIRTUE®

Level one -1

Level one -2

Level one -3

Level one -4

*This is just the first dungeon, and it has even more floors not shown here. There are eight new dungeons to explore!*

*You finally got the rune! Only seven more to go!*

*Things definitely get tougher later on. Places to go, monsters to kill.*

*Lord British tells about the caverns below the castle.*

## ADVENTURE CALLS...

FCI has recently added a two-player mode that allows you and a friend to explore eight completely new dungeons. When you start with two players, you find out from Lord British that the runes of the eight virtues are hidden in the catacombs below the castle. Upon descending down the stairs into the gloom, you find sets of ladders which will take you to the new crypts. The mazes are intricate, the monsters tough; this is why teamwork is a must! Sometimes, you have to work together to solve a particular puzzle. Gather up weapons and arm yourself for combat. Be sure to pick up everything you find, but beware of traps!

Ultima®: Runes of Virtue™ is one of the first role-playing games to utilize two players. Get ready for tandem adventure!

**A key!**

*Things to find in the dungeons!*

**A rune!**

*Alas, the brave warriors have died. Yet, you must fight on!*

## COME PLAY WITH YOUR FOOD!

You work for Odnet Video Games Center and in your research, you come up with a chemical called Rynoleum. Rynoleum is highly destructive and mutates anything it

contacts. The only time it is stable is when you freeze it. Odnet plans to use the dangerous chemical in their new video game, endangering millions of innocent gamers. You realize the error of your ways and break into Odnet and steal the samples of Rynoleum. Knowing they are only stable in the freezer, that's where

they go! Later that night, you awake to strange noises coming from the kitchen. You rush downstairs, and find the freezer door ajar and the temperature rising! Thinking quick, you try to close the door, but it is too late - the Rynoleum transforms your body into a terrible mutated being! Now, you must destroy all the nasty food roaming around your kitchen. Do it quickly, or the Rynoleum will become more unstable and ruin everything! So come clean out your fridge with Kungfood! Just how long has that potato salad been in there?

## Beast is Back!

Now we're talking about action and graphics to the max! The guys at Atari have got a sure-fire winner for the Lynx system. Shadow of the Beast is faithful to the original (yes, the one long ago for the Amiga). The graphics are incredible! With 16-Bit capability, Atari has been able to create an almost 3-D image. When you walk, the background will move independently and the effect is quite impressive.

You should remember the story: the Beast Lord turned you into the creature you are, and forced you to do his evil bidding. You always felt he was wrong and you hated him. He finally pushed too far when he sacrificed your father at the altar. Now you're on a rampage, out to kill any creature who stands in the way between you and your final battle with the Beast Lord.

Atari can be proud of this winner for the hand-held crowd. With its superior graphics and good sound, it will entertain for hours. So, when things start to heat up this summer, cool off in the Shadow of the Beast!

## WELL, SPEAK OF THE DEVIL!

The Taz is back with an appetite that won't quit. Luckily, a legend says that giant seabirds may live in the lost valley on the island of Tazmania. The giant seabirds happen to lay giant eggs - so large they could feed Taz's huge appetite as well as his whole family's! The U.S. National Video Game Team has blown through this great cart just for you. Here are some of the best techniques and tips to help you discover the hidden rooms in each level. Keep your mouth full, and win big!

### MAIN TECHNIQUES

**JUMP**

**SPIN**

**EAT**

**ATTACK**

### COLLECT THE ITEMS TO POWER-UP AND SURVIVE!

Red peppers will let you spit flames!

The trophy will let you continue at this point.

How not to spell relief: BOMB!

You will find various food items in the levels to refill your life. Try some cider, turkey, or fresh fish.

A Taz face with a 1 on it will provide a 1-up. A 3 will give you an extra continue.

### LEVEL ONE

1. As you first start the level, there will be some red peppers. Eat them and use them to burn the first crab and rock monster you see. 2. When you come to a sand pit, jump as high as you can and spin to the right. You should almost make it to the other side. 3. Do not ride the geyser that's right after the sand pit, or you will be killed. 4. The geyser that's right after the first trophy stand will bring you to the second half of the level. However, before you go all the way to the top, try jumping to the right when it is half way up. 5. You should find a bonus area with a 1-up. 6. An easy way to get to the exit is to ride the first geyser up and spin to the right.

## LEVEL TWO

1. Here's a handy shortcut. When you see the rock monster, jump on his head and get up on the platform above. Get the star and proceed to the left. 2. Be sure to eat the bombs before the star wears off and you'll be O.K. Jump straight up and you'll find a trophy stand. 3. Keep jumping up and to the right until you get to the top. Go all the way to the left and you'll find a 1-up. 4. You'll find a continue up on a ledge to the right of the 1-up. The only way to get it is to lead the rock monster over and use him for a boost. 5. Spin through the bridge area, and when you get to the rock monster on the ledge, jump up. 6. Another 1-up and continue!

## LEVEL THREE

### LEVEL THREE: BOSS ONE

This is one of very few bosses in this game. If you keep spinning, Taz will be invincible until you stop. The best way to beat this boss is to jump straight up and land on the roof when it drives by. Do this repeatedly until it falls apart!

## LEVEL FOUR

### LEVEL FOUR

1. Pick up this box and carry it to the left and place it under the platform to help you jump up. 2. Stand on the platform between the two blades, jump and do a short spin. You should land on the platform above the bomb. 3. If you are low on energy, this turkey should help out.

4. You can jump over the pistons by using the platforms in between or go under when they are in the upper position. 5. Spin through this area and you'll go through unharmed. 6. Jump down here for a shortcut. Be sure to get the 1-up below before progressing to the right! 7. Spin past the oven and get on the treadmills to get to the exit. If you fail, start spinning to remain safe.

## LEVEL FIVE

1. Throughout this level, there are switches that you must turn off in order to safely get through the machinery. The first one is easy to get to; just jump up by the first laser cannon you see. 2. When you see the turkey, jump up to the platform and get it. You may get shot by a laser, so jump over to the left as fast as you can. 3. Use the lever on the right to switch the machine off. The left one is booby-trapped. 4. Jump up at this spot and go to the left until you have to jump up to go any further. 5. Get the turkey and turn this switch off and progress to the right. Spin through the bombs. 6. If you jump over the machine and keep going right, you'll find a 1-Up and a turkey; get them and jump down the machine. 7. Jump up here to find the room with the next switch. 8. Get the continue and the turkey at the bottom of the room - don't touch the switches at the bottom! 9. The switch you need is in the upper right hand corner; hit it and go back out the way you came. Go to the right - you have to jump up to the exit while avoiding a laser that guards the platforms.

## LEVEL SIX

1. If you are low on energy in this level, look for fish laying on the ice. Don't forget that the ground is very slippery and Taz can't swim in ice water. 2. There are penguins lurking in some of the ice plateaus; just spin through to get rid of them. 3. The toughest part of this level is jumping over the ice filled lake without falling in. Some of the ice platforms will sink in the water after you step on them, and others will move back and forth. Use the jump and spin technique to get across. 4. When you get to land, sink on this platform to find a secret room. 5. In the room you'll find a 1-Up, a continue, some fish and a penguin guarding everything. 6. After getting all of the items in the secret room, just go to the right and jump up to exit.

## LEVEL NINE

## LEVEL SEVEN

1. The main enemy in this level is a headhunting tribe of mice. They are very easy to kill; a spin attack will knock them out. However, they throw spears in abundance! If they hit you when you're jumping, you may get knocked into a bottomless pit. 2. To get to certain ledges, you must practice using the jump-and-spin technique. 3. There are plenty of man-eating plants around. If you can get close enough, you can eat one. Be careful, because it may bite you and they don't refill your health. 4. The halfway stand for the trophy is at the top of the cliff. 5. When you get to the edge that looks like this and can see a mouse pacing on the ground, jump down. 6. Jump down where you see these two white stones, and you'll find a secret. 7. If you jump correctly, you'll find another trophy stand and a 1-Up. It is helpful to continue from this point, since you always get another 1-Up. 8. When you get to the highest point of the cliff that is near the end of the level, jump as high as you can and spin. 9. Keep spinning and exit safely.

## LEVEL EIGHT

1. There's a star when you start this level. Be sure you get it and it will help you get through the first part of the tree climb. 2. There are mice everywhere on this tree. If you get hit with a spear while jumping, you may fall back down to the ground. Use spins to take them out. 3. On this ledge a regular jump will do, but a short spin will guard you from the spears thrown by the pesky mice. 4. Use the red peppers and have some mouse toast. Enjoy! 5. When you get to this ledge, jump up onto the ledge to the right and you'll find a surprise. 6. Use this star to help you kill the second boss. When you get the star, jump over to the left to find him.

## LEVEL EIGHT: BOSS TWO

This boss is even easier than the first. With or without the star, all you have to do is spin while moving back and forth through him. You'll be invincible to his arrows as long as you are spinning!

## LEVEL NINE

1. Riding the logs from island to island really looks fun, but a safer alternative is to use the jump and spin technique. 2. When you get here, a man-eating plant will be waiting. Try to spin through him without hitting the turkey, and you can refill your life. 3. When you land; try not to pick up this bomb. Try spinning while you land, but don't fall in the water! 4. Spin past the bomb and help yourself to that 1-Up. 5. You are going to have to make a very long spin jump here. If you feel more confident with riding the logs, then go for it! 6. As soon you land from making this jump, start spinning so that you'll kill the man-eating plant. 7. Just another plant; spin right through it. 8. This bomb really isn't that threatening. However, to be on the safe side, get on the lower platform and spin by it. 9. Be sure you eat the turkey and refill your life before going any further. 10. Here is the one part of this level where you absolutely must ride the logs. The pattern is easy: stay on the log until it sinks three notches and jump to another log. You should make it through.

## Meet The Faces Behind Most Medical Advances.

There are a lot of doctors and researchers out there who deserve credit for society's medical achievements. But the fact is, they'll have to share the credit. Because before any medical project can break new ground, it has to get off the ground. And that takes money. We urge you to contribute to the hospital of your choice. Your help could mean a solution to many of today's most pressing medical concerns. The first of which is, quite frankly, funding.

# ROBOCOP 3™

OCP is sending in Rehab Officers to clear the streets of Old Detroit, making way for the construction of Delta City. When ROBOCOP sees helpless families forced out of their homes as the bulldozers move in, he joins the resistance movement to battle the Rehab's!

Armed with a new multi-weapon arm attachment containing a large-bore cannon and a smart bomb, plus a gyropack for airborne assault capability, ROBOCOP faces a battalion of ED-209's, tanks, heavy artillery and a new adversary, OTOMO. The odds seem impossible, but remember—you're ROBOCOP!
